Date: Dec, 31th, 2009
Model: 1xxx / 8000 / 8300 / 8400 / 8500 Series
Revision: All
Prepared By: George Hsieh
Circulation: Partner

Software: USB Virtual COM Driver

Previous Version: V4.40	**Updated Version:** V5.40.24

Dear All,

We've released a new USB Virtual COM Driver for both portable terminals and scanners.

The new USB Virtual COM Drivers support Windows 2000, Windows XP, Windows Vista, Windows 7, but different installation files are required as the following list:

Windows 2000, Windows XP, Windows Vista	Windows 7
CP210x_VCP_Win2K_XP_S2K3.exe	CP210x_VCP_Win7.exe

Please notice, before new driver installation, the old 308 USB virtual COM driver must be uninstalled. The "CP210x USB composite device" will be displayed in device manager after new driver is installed.

You can download the newest driver at www.cipherlab.com.

Please do not hesitate to contact us if you have any further question.
